EDUCATION

Dr. D. Y. Patil Institute of Technology, Pimpri

Bachelor of Engineering in Electrical Engineering

- Expected Graduation: July 2028 (Currently 2nd Year)

Pune, Maharashtra

Sept 2024 – July 2028

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, React, Node.js

AI/ML Specializations: LLMs, Multi-Agent Systems, RAG, Vector Databases

Developer Tools: Git, VS Code, Jupyter, ChromaDB, Supabase, Postman, Streamlit

Cloud & APIs: OpenAI API, GPT-4o, CLIP, Tavily API, Vercel, Render, Firebase

Other Skills: Data Structures & Algorithms, Full-Stack Development, UI/UX Design, AI Automation

EXPERIENCE

Co-Founder & AI Systems Lead

Autonix – AI Automation Agency

Jan 2026 – Present

Pune, India (Remote)

- Co-founded an AI automation agency building end-to-end AI systems for local service businesses across dental, aesthetic, and home service verticals in UK and UAE markets.
- Deployed a production AI receptionist for a UK dental clinic using Vapi, n8n, and Google Calendar – handling inbound call booking autonomously end-to-end.

Full-Stack Developer Intern

Own The Story (NGO)

Jan 2026 – Present

Remote

- Building and maintaining frontend features and backend APIs for production web applications supporting the NGO's community outreach programs.
- Developing scalable full-stack solutions using modern web technologies, participating in code reviews, and collaborating with cross-functional teams.

Member Lead (Web/App Developer)

Google Developer Groups – DIT Pimpri

Sep 2025 – Present

Pune, Maharashtra

- Leading web and app development initiatives for 200+ student members, organizing workshops and hackathons around emerging technologies and Google Cloud Platform.
- Built and deployed full-stack community applications using React, Node.js, and Firebase; mentoring junior developers on production-ready development practices.

PROJECTS

Agentic Research PRO | *Python, LLMs, ChromaDB, Tavily API, FAISS* | [GitHub](#)

2025

- Built an autonomous multi-agent research pipeline with 7 specialized agents covering web search (Tavily), scraping, semantic chunking, embedding (OpenAI), vector storage (ChromaDB), retrieval, and structured report generation.
- Implemented FAISS vector search with semantic chunking and automated PDF export with source citations and clickable URLs.

MedMind AI – Healthcare Platform | *React, Supabase, GPT-4o* | [GitHub](#)

2025

- Engineered an AI-powered healthcare assistant with medical history analysis, personalized health recommendations, and image-based nutrition analysis using GPT-4o.
- Built scalable backend with Supabase for real-time data sync, user authentication, and HIPAA-compliant document storage.

SkyVision – Multimodal Travel Search | *Python, CLIP, MariaDB Vector, Streamlit* | [GitHub](#)

2024

- MariaDB Hackathon Shortlisted:** Built multimodal search engine for airports and airline logos using CLIP embeddings and MariaDB Vector, enabling natural language and image-based visual similarity search.
- Deployed Streamlit interface achieving 85% relevance accuracy on 512-dimensional CLIP embeddings via cosine similarity.

ACHIEVEMENTS & CERTIFICATIONS

Flipkart GRID Hackathon – Semifinalist: Qualified to the semifinal round among 35k+ participants; further evaluation currently in progress.

VIBE HACKS 2025 – 2nd Place Winner: Secured 2nd place among 600+ teams by developing an innovative AI solution addressing real-world challenges.

6th Rank – InterCollege Hackathon: Ranked 6th among 200+ teams in competitive programming and innovation challenge.

LeetCode 50 Days Challenge: Completed 50-day coding challenge, solving 200+ DSA problems to strengthen algorithmic thinking.

Supervised Machine Learning – Regression and Classification: Coursera (Andrew Ng).

Using OpenAI APIs – Exploring APIs with the OpenAI Playground: Skillssoft.

Frontend Developer Certification: OneRoadmap.
